Basawaraj Malipatil/ Scientometrics Study on Indian Journal of Psychiatry (2015-2021)/ Indian J Lib Inf Sci 2023; 17 (2):119–122.

#### Abstract

Scientometrics analysis of Indian Journal of Psychiatry from 2015 to 2021 yields quarterly and bimonthly wise distribution of articles, authorship pattern, volume wise productivity, distribution of document in Indian Journal of Psychiatry from 2015 to 2021.

Keywords: Scientometrics; Indian Journal of Psychiatry; Authorship pattern; Degree of collaboration.

#### INTRODUCTION

Scientometrics is the field of study which Sconcerns itself with measuring and analyzing scholarly literature. In practice there is a significant overlap between scientometrics and other scientific fields such as information systems, information science, science of science policy, sociology of science and metascience. Bibliometrics and Scientometrics are types of research methods used in Library and Information Science. Scientometrics has been defined as quantitative and qualitative measuring techniques for evaluation and interpretation of science including its different

activities, like productivity, progress, organization and management of science by application of the mathematical and statistical calculations. Modern scientometrics is mostly based on the work of Derek J.de solla price and Eugene Garfield.

#### Source Journal

The Indian Journal of Psychiatry is a quarterly peer-reviewed open access medical journal. It is published by Medknow Publications on behalf of the Indian Psychiatric Society. It established in 1949. It is a quarterly journal published 4 issued /year up to 2019, onwards it bimonthly/ yearly six issued with supplementary copies. It covers research in all fields of psychiatry. OCLC number is 746945928. Its ISSN No. 0019-5545.

#### **Abstracting and Indexing Information**

The journal is registered with the following abstracting partners: Baidu Scholar, CNKI (China National Knowledge Infrastructure), EBSCO Publishing's Electronic Databases, Ex Libris – Primo Central, Google Scholar, Hinari, Infotrieve, National Science Library, Pro Quest, TD Net, Wanfang Data.

The journal is indexed with, or included in, the

#### following:

DOAJ, EMBASE/ Excerpta Medica, Indian Science Abstracts, IndMed, PubMed Central, Scimago Journal Ranking, SCOPUS, Science Citation Index Expanded, Web of Science.

Impact Factor® as reported in the 2020 Journal Citation Reports® (Clarivate Analytics, 2021): 1.759.

## **Journal Ethics**

Wolters Kluwer and Journal/ Association are committed to meeting and up holding standards of ethical behavior at all stages of the publication process. We follow closely the industry associations, such as the Committee on Publication Ethics (*COPE*), International Committee of Medical Journal Editors (*ICMJE*) and World Association of Medical Editors (*WAME*), that set standards and provide guidelines for best practices in order to meet these requirements. For a summary of our specific policies regarding duplicate publication, conflicts of interest, patient consent, etc., please visit www.Medknow.com/EthicalGuidelines.asp.

# Open Access Publication and Creative Commons Licensing

This is an open access journal, and articles are distributed under the terms of the Creative Commons Attribution Non-Commercial Share. A like 4.0 License, which allows others to remix, tweak, and build upon the work non-commercially, as long as appropriate credit is given and the new creations are licensed under the identical terms.

## **Digital Archiving**

Wolters Kluwer Med know provides for longterm digital preservation through two primary partnerships, Portico and CLOCKSS.

Portico is a leading digital preservation service worldwide. The content is preserved as an archival version and is not publically accessible via Portico, but is provided when required under specific conditions, such as discontinuation of the collection or catastrophic failure of the website.

CLOCKSS will enable any library to maintain their own archive of content from Wolters Kluwer Medknow and other publishers, with minimal technical effort and using cheaply available hardware.

#### A head of Print policy

Articles published online under the A head of Print model are considered published and can be cited and quoted using the DOI as the reference source. Wolters Kluwer Medknow has a policy that changes will not be made after publication of an article without following accepted procedures for making corrections to the scientific record.

#### Advertisements

While advertisements are crucial to this journal to be able to keep all content free for everyone, ethical considerations are in place to ensure the integrity of the journal and its content:

"Pop-up" and "banner" ads appear on a random, rotating basis. The advertiser has no control or input over the pages where their ads appear. The Editorial Board has full and final approval over the content of all advertisements.

Advertisers will never be shown any manuscripts or other content prior to publication.

#### **Medknow Publications**

Medknow, part of Wolters Kluwer Health, is one of the largest open access publishers worldwide with more than 450+ medical journals in its portfolio. Students, researchers, clinicians and other healthcare professionals worldwide access Medknow journals to help them fuel new discoveries and improve patient care.

Founded in 1997, Medknow is a well respected medical publisher that fully supports many of the popular open access models through its peerreview management system. Medknow's open access policy has resulted in more than a half a million article downloads monthly for all of its journals.

Wolters Kluwer Health (Philadelphia, PA) is a leading global provider of information, business intelligence and point-of-care solutions for the healthcare industry. Serving more than 150 countries and territories worldwide, Wolters Kluwer Health's customers include professionals, institutions and students in medicine, nursing, allied health and pharmacy. Major brands include Lippincott Williams & Wilkins, Ovid®, Up To Date®, Medi-Span<sup>®</sup>, Facts & Comparisons<sup>®</sup>, Pharmacy One Source<sup>®</sup>, Lexicomp<sup>®</sup> and Pro Vation<sup>®</sup> Medical. Wolters Kluwer Health is part of Wolters Kluwer, a market leading global information services company with annual revenues (2019) of €3.4 billion (\$4.7 billion), approximately 19,000 employees worldwide and operations in over 40 countries across Europe, North America, Asia Pacific, and Latin America.

#### **Medknow Specialties**

Online and Print Scholarly Publishing, Peer-Review System, Specialized in Medical Research, Largest Open Access Publisher.

#### Objectives of the study

- To analysis the chronological growth of literature during 2015-2021.
- To find out year wise distribution of articles.
- To find average number of citations per volume.

- To examine the authorship pattern of the contribution.
- To study the international geographical distribution of contributions.

## METHODOLOGY

Table 1 shows the number of 940 original articles published during the period from 2015 – 2021. Maximum number of articles was published in the

| Year | Volumes No. | No. of Articles | Percentage |
|------|-------------|-----------------|------------|
| 2015 | 57          | 123             | 13.08      |
| 2016 | 58          | 124             | 13.20      |
| 2017 | 59          | 135             | 14.36      |
| 2018 | 60          | 109             | 11.60      |
| 2019 | 61          | 143             | 15.21      |
| 2020 | 62          | 180             | 19.15      |
| 2021 | 63          | 126             | 13.40      |
| ,    | Гotal       | 940             | 100        |

Table 1: Chronological growth of original articles

year 2020 in Vol. No. 62 with 180 (19.15 %) articles and in the year 2018 Vol. No. 60 contributed only 109 (11.60 %) original articles.

Table 2 shows that the authorship pattern of contribution from the collected data from this it can be inferred that, the multi authors contribute more

| Author   | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | Total | Percentage |
|----------|------|------|------|------|------|------|------|-------|------------|
| Single   | 22   | 17   | 20   | 6    | 14   | 23   | 10   | 112   | 13.25      |
| Double   | 34   | 27   | 25   | 12   | 9    | 35   | 19   | 161   | 19.05      |
| Triple   | 29   | 25   | 20   | 18   | 30   | 38   | 26   | 186   | 22.02      |
| Multiple | 48   | 43   | 62   | 44   | 57   | 60   | 72   | 386   | 45.68      |
| Total    |      |      |      |      |      |      |      | 845   | 100        |

Table 2: Author Pattern

number of articles followed by multiple author and then Triple, Double authors and single author contribute minimum number of articles. The table 3 shows that the contribution made by Indian authors is maximum. 556 (59.14%) of total articles published during the research period from

Table 3: Geographical distribution at international level on indian journal of psychiatry from 2015-2021

| Rank<br>Number | Name of the Country | Total number of contribution | Percentage |
|----------------|---------------------|------------------------------|------------|
| 1              | India               | 556                          | 59.14      |
| 2              | United Kingdom      | 135                          | 14.36      |
| 3              | Australia           | 60                           | 6.38       |
| 4              | USA                 | 45                           | 4.78       |

## FINDINGS AND CONCLUSION

A total of 940 original articles were published in Indian Journal of Psychiatry from the year 2015-2021. The maximum number of publication is found in the year 2020 with 180 (19.15%) articles with 839 (19.20%) citations. Maximum number of contributions by multi authors (386 of 45.68%). Geographical wise contribution by Indian authors is 556 (59.14%) and gender wise contribution of articles shows that male authors (636) contributed maximum (75.26%).
